## Transport Permit Application Form

### INSTRUCTIONS

1. Print legibly.
2. All blanks must be filled. If the information is not applicable, enter "N/A".
3. Forms must be signed and certified by a notary public.

### IMPORTANT NOTES

1. A transport permit application must be declared administratively complete by the District General Manager before the application can be considered for approval. An application may be rejected as not administratively complete if the District finds that substantive information required by the application or District staff is missing, false or incorrect.
2. A transport permit will be subject to public hearing prior to consideration for approval.
3. Processing fees, if required, must accompany the application. Failure to pay processing fees could result in an application being declared as not administratively complete.
4. A permit is not a vested right of the holder and may not be transferred by the holder. A permit may be transferred by the Board and/or General Manager to another person by submitting the proper documentation.
5. Applicant should check District Rules to verify whether a hydrogeological report, a mitigation plan, water conservation plan and/or a drought contingency plan is required.
6. A map **MUST** be included showing the location of the wells supplying the groundwater, the route of water conveyance and the receiving location. If necessary, the District can help applicants by providing a map of the appropriate area.
7. If the water provider and water user are not the same, then a contract between the appropriate parties must be included with this application.
8. The District has the right to charge a fee not to exceed 2.5 cents per thousand gallons for water transported beyond the boundaries of the District.
9. The applicant is responsible for ensuring that the Rules and Regulations of the CCGCD will be followed. Lack of knowledge of the Rules is not a defense of violation of the Rules.

<b>8. REPORTS &amp; PLANS</b>	
Is applicant required to have a hydrogeological report?	Is report attached?
Is applicant required to have a water conservation plan?	Is plan attached?
Is applicant required to have an aquifer mitigation plan?	Is plan attached?
Is this project included in a government-sanctioned regional or state water plan? If so, is the plan attached or referenced?	
Is the applicant or receiver required to submit any other pertinent reports (i.e. drought contingency plans) to any other agencies? If so, attach the report(s).	

<b>9. MONITORING TRANSPORT</b>
Will the well or wells that are supplying the water be metered?
Will there be any other way to monitor the amount transported?
If so, what?

<b>10. APPLICATION FEE</b>
Are appropriate fees accompanying this permit application form?

**CERTIFICATION:**

I hereby agree that the groundwater referenced in this application that will be transported from the District will be put to beneficial use. I further certify that the information given herewith is true and accurate to the best of my knowledge and belief.
